APPROVAL OF STATE ENGINEER		
This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:		
heretofore granted under Permit 21318, Certificate 7792 is issued subject to the terms and conditions imposed in said Permit 21318, Certificate 7792 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a measuring device must be installed in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times. This Permit does not extend the permittee the right of ingress and egress on public, private or corporate lands. The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies. The total combined duty of water under Permits 01322, 03023, 50919, 50920, 50921, 50922, 50923 and 50924 shall not exceed 4507.88 acre feet annually for the irrigation of 1126.97 acres within the described place of use.		
The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not		
to exceed 4.05 cubic feet per second, but not to exceed 1094.2 acre feet annually, and not to exceed a yearly duty of 4.0 acre-feet per acre of land irrigated from any and/or all sources.		
Work must be prosecuted with reasonable diligence and be completed on or before February 2, 1991.		
Proof of completion of work shall be filed before		
Application of water to beneficial use shall be made on or before February 2, 1993
